Portfolio: <https://aryan-suthar-portfolio.vercel.app>

PROFESSIONAL SUMMARY

Software Engineer with 4+ years of experience building scalable, high-performance distributed systems. Expertise in microservices architecture, cloud-native development, and AI-integrated applications using Java, Python, Kafka, and Kubernetes. Proven ability to optimize system performance, reduce latency, and improve scalability across AWS and Azure environments. Strong background in API development, event-driven systems, and data-intensive platforms.

TECHNICAL SKILLS

- Programming & Core Engineering:** Java, Python, TypeScript, JavaScript, SQL, C#, C++, Bash, Data Structures, Algorithms, Object-Oriented Design
- Backend & API Engineering:** Spring Boot, FastAPI, Django, Node.js, Express.js, .NET Core, RESTful APIs, gRPC, API Design, API Security, Service-Oriented Architecture
- Frontend Engineering:** React, Next.js, TypeScript, HTML5, CSS3, Component-Based Architecture, Responsive UI Development
- Cloud & Distributed Systems:** AWS (EC2, Lambda, S3, SNS, SES), Azure (AKS, Functions, Service Bus, Blob Storage), Microservices Architecture, Serverless Computing, Distributed Systems Design, High Availability, Scalability Engineering
- Event Streaming & Messaging:** Apache Kafka, Event-Driven Architecture, Asynchronous Processing, Stream Processing, Message Queues
- Databases & Caching:** PostgreSQL, MySQL, MongoDB, DynamoDB, Redis, Data Modeling, Query Optimization, Indexing Strategies, Distributed Caching
- AI/ML & Generative AI:** Machine Learning, Deep Learning, NLP, Computer Vision, PyTorch, TensorFlow, LLMs, Retrieval-Augmented Generation (RAG), LangChain, Vector Databases, Embeddings Optimization, MLflow

PROFESSIONAL EXPERIENCE

Software Engineer

Avnet, Arizona, USA | Dec 2025 – Present

- Architected a high-throughput microservices platform using Java, Spring Boot, and Apache Kafka, processing 2M+ daily transactions and improving system scalability by 45% under peak loads
- Engineered low-latency RESTful and gRPC APIs with Node.js and .NET Core, reducing response time by 38% and enabling seamless cross-service communication across distributed systems
- Optimized cloud-native deployments on AWS (EC2, Lambda, S3) and Azure (AKS, Service Bus), cutting infrastructure costs by 27% while maintaining 99.98% system uptime
- Implemented event-driven data pipelines leveraging Kafka and asynchronous processing, increasing data ingestion throughput by 3.2x and eliminating bottlenecks in real-time workflows
- Designed advanced database schemas and indexing strategies across PostgreSQL and MongoDB, improving query performance by 41% and reducing data retrieval latency for large-scale datasets
- Integrated AI-driven semantic search using vector databases and LangChain-based RAG pipelines, enhancing search relevance by 33% and accelerating internal decision workflows

Software Engineer

Orion Technolab, India | Jan 2021 – Jul 2024

- Developed scalable backend systems using Python, Django, and FastAPI, handling 500K+ daily API requests with a 35% improvement in processing efficiency
- Built responsive frontend applications with React and Next.js, boosting user engagement by 28% through optimized component rendering and UI performance tuning
- Deployed containerized applications using Docker and Kubernetes, achieving zero-downtime releases and improving deployment frequency by 2.5x
- Automated CI/CD pipelines with GitHub Actions and Bash scripting, reducing manual deployment effort by 40% and improving release consistency across environments
- Strengthened API security by implementing OAuth2 and JWT-based authentication, reducing unauthorized access incidents by 60% and ensuring compliance with security standards
- Leveraged Redis caching and distributed caching strategies, decreasing database load by 37% and improving application response time during high concurrency
- Collaborated on machine learning integration using TensorFlow and MLflow pipelines, increasing predictive model accuracy by 22% and enabling data-driven feature enhancements

PROJECTS

Physio – AI-Powered Rehabilitation Platform

<https://github.com/aryanrajendrasuthar/Physio-App>

- Full-stack physiotherapy platform with personalized onboarding, routine tracking, analytics, and secure authentication

Distributed AI Simulation Platform

<https://github.com/aryanrajendrasuthar/Real-Time-AI-Simulation-Tool>

- AI-powered courtroom simulation platform using RAG and multi-phase prompt orchestration for realistic legal practice.

Emofusion – Emotion Detection System

<https://github.com/aryanrajendrasuthar/EmoFusion>

- Multimodal emotion detection system combining computer vision and NLP with a late-fusion deep learning architecture.

AI Knowledge Assistant

<https://github.com/aryanrajendrasuthar/AI-Knowledge-Assistant>

- Production-oriented RAG system with vector search, Redis caching, and low-latency document-grounded Q&A.

EDUCATION

Master of Science in Software Engineering

Arizona State University, USA | Aug 2024 – May 2026

CERTIFICATIONS

- Atlassian Agile Project Management Professional Certificate
- DevOps Professional Certificate by PagerDuty and LinkedIn
- Java Foundations Professional Certificate by JetBrains
- Microsoft Azure AI Essentials Professional Certificate
- Programming Foundations: Design Patterns
- Java: Data Structures
- Java Object-Oriented Programming | Certificate
- Learning JDBC | Certificate
- Lambda Test Automation Professional Certificate|

ACHIEVEMENTS

- Solved 500+ problems on LeetCode (Data Structures & Algorithms)
- Strong expertise in system design and scalable backend architecture
